- Con. Backfill of east & North Walls
- Started installing metal decking on North and South sides.
- Placed south Half 1st floor Penetrations
- Poured the first floor slab on metal deck on the South half of the building

Monthly Progress Report

PROGRESS REPORT: This March, structural steel continued to be erected on both the North and South sides of the building. We are currently erected through the 4th floor on the South Half of the New Building, with the anticipation of being topped up by the end of next month. Metal decking was placed on the 1st & 2nd floor South half of the Building and the 1st floor North half was also placed. We also have our 1st floor SOMD poured on the South side.

As construction continues, Manhattan will issue monthly progress reports throughout the construction process. Typically, these reports are generated and transmitted on the last day of each month. These reports are meant to serve as a tool for OSU Long Range Facilities Planning to document production and keep interested parties updated with progress whom would not otherwise be involved on a daily basis.

Manhattan is proud to partner with OSU Long Range Facilities Planning, Spears School of Business, and Elliot and Associates on this project.
