Eliminating the personal income tax…

• Governor’s Task Force: “We recommend that Governor Fallin…initiate a 10 year program to significantly reduce then ultimately eliminate the Oklahoma personal income tax.”

• Academy Town Hall: “The state income tax should not be eliminated until further independent studies have been conducted on the impact and a budget-neutral strategy has been developed.”
Budget Impact

Personal income tax accounts for more than 35% of state general revenue. Three possible outcomes:

• New state property tax
• Higher state sales tax
• Smaller government (less spending for education, children’s health care, roads, and prisons)
Oklahoma economy is already performing well

- Real per-capita GDP growth (2000-2010): 15th, faster than 6 of 9 states lacking personal income tax
- Per-capita personal income growth (2000-2010): 11th, faster than 6 of 9 states lacking personal income tax
- Median household income growth (2000-2010): 4th, faster than all states lacking personal income tax
Is the Texas model good for middle-class families?

- Tax burden for middle-income quintile is nearly 3X the burden for highest-earning 1%
- Tax burden for lowest quintile is nearly 4X the burden for highest-earning 1%
What Should We Do?

Eliminating the income tax will:

• Threaten important government services
• Shift tax burden to middle- and lower-income families
• Without providing an economic boost

Focus should be on enhancing Oklahoma’s image
