Course Objectives

Objectives of this course include enabling every student to effectively use compensation and benefits concepts and principles to develop and apply human resource management strategies that contribute to achieving organizational goals. This course is not simply about compensation and benefits; it is knowledge about powerful theories and principles that can be used to shape and mold organizations. Students will demonstrate both knowledge and understanding in examinations and application of concepts in the required project and assignments. It is my goal to give as many real-life examples as possible and design project work around realistic needs of companies so that students can be better prepared to tackle these issues in their careers.
